The "**NEW**" 215-LED utilizes 'Breakthrough Technology'

- LEDs are solid state, no filament that is susceptible to shock or vibration if dropped
- Bright as an incandescent bulb, but never burns out - never have to replace a bulb again!
- Low voltage warning circuit with a red LED senses when battery needs to be recharged or replaced
- Red or Amber LEDs draw 120mA compared to 500mA drawn by the standard bulbs
- Rechargeable battery will now last up to 80 hours before needing a recharge!!!
- New stronger base
- LED Colors: Amber, Blue, Green, Red, or White
